

DIESEL STUDENTS!

Want to Qualify for up to \$10,000 in Reimbursement for Tools and School?

Peterson is excited to announce a technician student sponsorship program!

If you're planning to start a diesel program, currently enrolled in one, or recently graduated, please consider a career with Peterson Cat! When you choose a

career at Peterson, we'll enroll you in a technician student sponsorship program that will give you up to \$10,000 in reimbursement for tools and school. Here's how it works:

- At the beginning of the program, Peterson will provide you with a set of tools (a \$5000 value!) upon successful completion of the company's pre-employment hiring criteria
- During the Cooperative Work Experience (CWE) portion of your schooling and (when available) during quarter breaks and summers, you'll work for the dealership at a location specified by Peterson
- Upon graduation and achieving employment with Peterson, the tools become yours!
- ...AND Peterson will reimburse your tuition up to \$5000!
